

April 14, 2022

Dear Family Member,

I want to inform you that it is being predicted that the new COVID BA.2 strain is the dominant strain moving across the US. We are seeing increased positive cases throughout NY and our region. The new strain is extremely contagious, but reports are that symptoms are less severe than previous strains. We did not have new positive residents this week, but did have a couple more positive employees.

Our staff continue to be regularly tested and continue to wear the necessary Personal Protective Equipment (PPE) to protect our residents and their co-workers. PPE includes, medical grade masks, N95 masks, eye protection, gowns and gloves.

As visitors, please continue to wear your masks and wash your hands when visiting. Allow some extra time at your visit to complete the provided "At Home Test." Thank you in advance for complying with our infection control protocols. I wish you and your families a very Happy Easter!

Sincerely,

Fortunato Scerbo III

Administrator
