

February 2, 2022

Dear Family Member,

Happy Groundhog Day! Unfortunately, it looks as though we will have six more weeks of winter. I wanted to give you a quick COVID update. After testing all residents and staff this week, I am happy to report that there have been no new positive cases identified. We have officially ended the quarantine for all residents and are not considered to be in “outbreak” status any longer.

I do want to caution everyone that the prevalence of COVID cases remains high throughout our region, but declining. We must continue the heightened awareness and adherence to the infection control measures to minimize the spread of the virus, including use of medical grade masks, social distancing and hand washing. The requirement for testing of all visitors remains in effect and we have a good supply of home tests for you to utilize upon arrival.

I want to thank you for all your patience as we ensure our compliance with testing and screening of visitors. I understand this process can take some time and we appreciate your cooperation. As always, thank you for your support.

Sincerely,

Fortunato Scerbo III
