

Oneida Health
exceptional care... always

March 1, 2022

Dear Family Member,

As we get closer to spring, we are seeing a drastic decline in positive COVID cases throughout our region and New York State. Unfortunately, we are still seeing the positive cases pop up here and there with our residents and our staff. We had another resident test positive yesterday as a result of our routine testing. Today we will continue to test our staff. For the most part, we have been fortunate that the majority of positive cases are experiencing very mild cold symptoms and recovering well. We continue to isolate positive individuals for a minimum of 10 days.

Our staff are wearing N95 respirators, gowns, eye protection and using hand sanitizer to prevent the spread. If you choose to visit, we require you to follow the visitor guidelines posted on our website. As always, I thank you for your cooperation and understanding.

Sincerely,

Fortunato Scerbo III

Administrator
