

**Oneida Health**  
*exceptional care... always*

March 12, 2022

Dear Family Member,

It is unfortunate that I have to report two more positive residents discovered over the weekend, bringing the total to four positive residents. We currently have no positive staff members. We are conducting our routine testing of all residents today and will test staff tomorrow. As I reported in my last communication, many residents and staff members have experienced a gastro-intestinal virus causing vomiting and diarrhea. Although this has greatly improved over the last week, we do still have a few residents and staff effected by it.

Please help us control the spread of these viruses by practicing good hand hygiene, especially when visiting in-person. Please be sure to wash your hands thoroughly with soap and water and use the provided hand sanitizer regularly. In addition, I thank you for cooperating with the cumbersome screening process, testing and masking.

Sincerely,

Fortunato Scerbo III

Administrator
