

Oneida Health
exceptional care... always

May 10, 2022

Dear Family Member,

As a result of this week's COVID testing of all our residents, we have no new cases to report. We are however only seven days from our last resident case. We currently have two residents who are positive and in their 14-day quarantine period. Both are doing very well with no symptoms. We currently have one staff member who has tested positive and is out of work.

Our staff continue to wear the necessary personal protective equipment and are exercising proper infection control practices to prevent any spread from staff to residents. Please continue to exercise caution when visiting in-person and be sure you are feeling well. Wash your hands regularly or use hand sanitizer, and wear a medical grade face mask covering your mouth and nose.

We appreciate your help in preventing further spread of COVID. Thank you for your cooperation and understanding.

Sincerely,

Fortunato Scerbo III

Administrator
