

May 13, 2021

Dear Family Member,

I wanted to write to you with a quick COVID update. As you know from my report last week, we had two employees who tested positive. We have conducted facility wide testing of both employees and residents and no new positive cases. Our fourth floor remains on isolation precautions for the remainder of the 14-day requirement due to the possible exposure. As long as there are no further positive cases, fourth floor will be allowed visitation starting Wednesday May 19, 2021.

Following the facility's first round of testing we were able to re-open visitation for the unaffected floors. Visitation has been working out well. I'd like to remind families that although not required, we encourage you to be COVID tested prior to your scheduled visit. Please visit our website for information on the Oneida Health COVID testing clinic. I'd like to remind you that in-person visits require a health screen and performance of hand hygiene. We also still require you to maintain social distancing from residents and masks are required at all times.

Your cooperation is very much appreciated.

Sincerely,

Fortunato Scerbo III

Administrator
