

Oneida Health
exceptional care... always

May 17, 2022

Dear Family Member,

I just wanted to give a quick COVID update for the Extended Care Facility. Today we tested all our residents as part of our routine testing. There has been one new positive case identified. The resident is not presenting any symptoms. The two most recent positive residents are now beyond their 14 days and are considered recovered. We do have a couple employees out due to positive test results. We will be testing all staff again this week.

Our staff are still required to wear face masks and other necessary personal protective equipment, along with exercising good hand hygiene. I am confident that the risk of staff transmitting the virus to our residents is very minimal. I ask you to continue to follow the required infection control protocols as well to prevent further spread.

Thank you for your cooperation and understanding.

Sincerely,

Fortunato Scerbo III

Administrator
