

May 30, 2020

Dear Fellow Employee,

As we close out the month of May, we continue to see slow volume growth in a number of areas. Although not back to where we were pre-COVID 19, growth from very low volume numbers during the height of the pandemic continues to occur. Our ability to provide a safe option for community members to seek care has positively impacted that growth. We need to continue that focus to ensure all who come to us for care as well as each other, are safe.

We have tested 2372 individuals to date, 2141 negative, 143 positive with 88 now pending results. We did receive 91 results back today, 90 of which were negative. One employee of the ACF tested positive due to exposure from a positive family member. That person has been out of work and we do not believe there was any exposure here at the hospital. The results by category were as follows: Elective procedures 13/0, Inpatient 6/0, ED 5/0, Practices 8/0 and ECF staff 59/0. The community member testing and the ECF staff testing reflect no positives, which is great!

Thank you for being at work today and for providing safe care to our patients and residents. Please continue to adhere to PPE requirements as well as the protective guidelines. It is working....

With Sincerest Gratitude,

Gene F. Morreale
President and CEO
