

May 31, 2020

Dear Fellow Employee,

Not much new to report today which is not a bad thing. All appears to be well other than we still have a positive COVID patient present for care from time to time. ED was rather busy yesterday seeing 57 patients which is close to our budgeted (average) number of 65.

We have tested 2445 individuals, 2205 negative, 144 positives with 96 pending. We received 65 results back today as follows: Elective Procedures 38/0, Inpatient 7/1 pos., ED 3/0, Practices 12/0 and ECF Staff 4/0. We now have 1 positive inpatient with 11 pending.

The month of June will hopefully bring us continued volume growth so that we can continue to financially weather this storm. Revenue for May will again be significantly lower than budget which will mean we will need to use the Federal Safe Act Stimulus funds to cover our costs. That is what the money was intended for, so it will be used in that manner. We will need to report to the Federal Government how we have used those funds. Our Finance team continues to monitor our situation closely and complete the required documentation.

Thanks to all for your continued support during this very challenging time.

With Sincerest Gratitude,

Gene F. Morreale  
President and CEO
