New Primary Care Office in Camden

Camden, NY – On August 3, Oneida Health announced the opening of a new primary care office in Camden, Oneida Health Family Care, and introduced its new office provider, Family Nurse Practitioner Jessica Donaldson. The family care office offers preventative and primary care to patients of all ages.

“At Oneida Health, we remain committed to providing quality health care services close to home,” said Gene Morreale, President and CEO of Oneida Health. “Convenient access to primary care is essential to the overall health of our communities. We welcome Jessica Donaldson, FNP, to our network of primary care providers and look forward to providing exceptional family care to the greater Camden community.”

Donaldson is a board certified Family Nurse Practitioner with more than 11 years of experience in health care, including eight years of experience in emergency and critical care. She earned her bachelor of science in Nursing from Utica College of Syracuse University and her master of science as a Family Nurse Practitioner from Le Moyne College in Syracuse. She also serves as a volunteer Emergency Medical Technician (EMT) with the Vienna Volunteer Fire Department.

Along with her husband, Donaldson has raised six children in the greater Camden area where she has lived for over 30 years. “It’s a rewarding experience to promote the health and well-being of the community where you reside with your own family,” said Donaldson. “I’m excited to be joining Oneida Health and continuing to provide primary care in the Camden area. I look forward to meeting new patients as well as seeing some familiar faces at our new Oneida Health office.”

Located at 9562 NY-13 next to Tops, Oneida Health Family Care will be located in the same building as several additional services provided by Oneida Health. These services include Quick Care, which provides walk-in non-emergency care, the Gorman Imaging Center, Women’s Health, and Camden Lab Draw. Oneida Health Family Care will operate out of the same suite as Quick Care and Women’s Health.

“Oneida Health is providing a unique opportunity for primary care patients in Camden that I’m excited about being a part of,” said Donaldson. “By having a multitude of services under one roof, my patients will have convenient access to imaging and lab testing, after-hours non-emergency care, and GYN specialty services that you typically do not find at one location in a

rural community. The ability to collaborate with these services will create a continuity of care that delivers better outcomes and support for our patients. It will be a great benefit for them.”

Oneida Health Family Care is currently accepting new patients of all ages – from kids, teens, to adults and seniors. For more information or to schedule an appointment, please call 315-245-5029 or visit oneidahealth.org.
